## 24/7 Emergency

## Internal Medicine

## Surgery

Our Emergency doctors and nurses are on site nights, holidays and weekends, 365 days per year. The patients in our hospital are never left unattended and as your pet recovers, he or she will be cared for at all times. Follow your intuition, trust your instincts, no one knows your pet better than you. If you have a question or a concern, please call or come in.

### When to seek emergency care

- Trauma
- Infection
- Heat stroke
- Difficulty breathing
- Seizure
- Foreign body
- Toxin ingestion
- Vomiting and/or diarrhea
- Urinary blockage
- Lacerations

Our board certified Internal Medicine specialists work in conjunction with their patient's primary veterinarian to ensure a comprehensive evaluation and work up. Our board certified internists have knowledge of complicated, uncommon, rare medical conditions and are trained in the use of advanced diagnostic and therapeutic equipment.

### When to seek an Internal Medicine Specialist

- Multiple disease conditions that are difficult to manage
- Complicated endocrine diseases such as Diabetes Mellitus, Hyperthyroidism, or Cushing's Disease
- Unresolved breathing problems
- Bleeding disorders or anemia
- Liver disease
- Unexplained weight loss
- Chronic vomiting or diarrhea

Our veterinary surgeons possess the experience, training and expertise to manage complex surgical procedures. The surgery team at BEVS is dedicated to improving the health, quality of life, and well-being of our patients by providing open communication and strong support for our clients.

### When to seek a Surgeon

- Diagnosis of orthopedic diseases and full discussion of surgical and medical treatment options
- Cancerous masses requiring surgical excision and reconstruction
- Trauma involving the thorax, abdomen, neurologic or musculoskeletal systems
- Abdominal or thoracic mass removals including liver, spleen and lung lobe masses
